STATIONARY OXYGEN CONCENTRATOR

## MAINTENANCE-FREE DESIGN

With a unique design that eliminates costly preventative maintenance schedules, get the most of your stationary inventory without having to worry about extra patients visits and replacement filter costs.

### • CAIRE Invests in Quality

Design changes in November 2013 drastically increased overall durability, and improved the reliability of valves and sieve beds. This has reduced failure rates to an all-time low and has set a new standard for high-performing 5 LPM concentrators.

### • Reduced Cost of Ownership

Combining low failure rates with no preventative maintenance costs creates a high-performing stationary with a low total cost of ownership.

### • Lightweight and Power Efficient

At only 30 lbs (13.6 kg) with side and top handles, the VisionAire<sup>™</sup> 5 is one of the lightest and easiest to deliver stationaries available.

Its 290 W power draw at all settings is incredibly efficient, and industry leading at 5 LPM.
